S.B.S Nagar, Punjab, India

Summary

Full-stack developer skilled in building cloud-native, scalable apps with MERN, TypeScript, and modern UI frameworks. Delivered projects like an AI-powered healthcare assistant (Gemini LLM + NL) and a youth engagement platform with RBAC, gamification, and cloud integration. Focused on secure authentication, performance optimisation, and clean architecture, with deployment experience on Vercel, MongoDB Atlas, AWS SES, and Google APIs.

Education

❖ **Bachelor of Technology: Computer Science & Engineering**
Lovely Professional University 2024 to 2028
CGPA: 8.62

Achievements & Certification

❖ **Code-A-Haunt |** Coding Blocks
Feb 2025

- Developed an AI-powered healthcare assistant using the Google Gemini 2.0 API and LLM-based NLP models for symptom analysis and doctor recommendation.
- Secure Top 15 Rank.

❖ **React.js Certification |** Tech Veda
Jan 2025

- Completed a 15+ hour MOOC on React.js with a proctored examination, demonstrating frontend development proficiency and continuous learning.

❖ **Introduction to DSA Certification |** Coding Tantra - Jan 2025

- Successfully completed a 15+ hour Data Structures & Algorithms course with a proctored assessment.

❖ **Programming Using C++ |** Infosys Springboard
Aug 2025

- Completed certified training in C++ programming, covering problem-solving, OOP concepts, and core programming fundamentals.

My Skills

- **Frontend:** React.js, TypeScript, JavaScript, MUI, HTML, CSS, Tailwind
- **Backend:** Node.js, Express, MongoDB, MySql, Mongoose, JWT/OAuth Authentication
- **Tools & DevOps:** Git/GitHub, ESLint, Postman, VS Code, Google AI
- **Other:** Java, Python, C, C++

My Projects

❖ **Niraksha Guardian | niraksh.bhemu.in |** January 2025

- Built an AI-powered healthcare guidance platform that converts user symptoms into structured health insights and possible condition analysis using LLM-based models.
- Implemented an intelligent doctor recommendation system using symptom relevance, location, experience, and quality-based scoring.
- Achieved 95%+ accuracy in prescription/symptom analysis, improving patient safety and decision support.

❖ **RoadFix | roadfix-new.vercel.app |** May 2024

- Developed a full-stack road issue reporting platform that enables users to upload pothole and road damage complaints with image-based evidence and live location tracking.
- Implemented secure authentication, real-time status tracking, and an admin dashboard for monitoring, verification, and resolution of reported issues

❖ **Type Master | type-master-seven.vercel.app |** June 2025

- Developed a typing practice platform to improve users' typing speed, accuracy, and keyboard proficiency through interactive exercises.
- Implemented real-time WPM (words per minute), accuracy calculation, error detection, and performance analytics for detailed progress tracking.
- Integrated timer-based challenges and result visualisation features to enhance user engagement and learning efficiency.
