SKILLS SUMMARY

Languages : C, C++, Java, Python, DSA
Frontend : Next.js, React.js, TypeScript, JavaScript, Tailwind, HTML, CSS
Backend : Node.js, Express, MongoDB, MySQL, Mongoose, REST APIs, JWT/OAuth
Tools/Platforms : Leetcode, Git/GitHub, ESLint, Vercel, Postman, Claude Code, Google AI
Soft Skills : Problem-solving, Team Collaboration, Adaptability, Continuous Learning

PROJECTS

Civic Connect | GitHub | Live — Aug 2026

- Developed a full-stack road issue reporting platform that enables users to upload pothole and road damage complaints with image-based evidence and live location tracking.
- Implemented secure authentication, real-time status tracking, and an admin dashboard for monitoring, verification, and resolution of reported issues.
- Built an efficient complaint management system that allows authorities to prioritize road issues, verify submitted reports, and update users throughout the resolution process.

TypeMaster | GitHub | Live — Jun 2026

- Developed a modern typing test application using React.js and Tailwind CSS, providing interactive typing tests with real-time feedback.
- Implemented WPM, CPM, accuracy, error analysis, and typing consistency metrics, along with multiple time- and word-based test modes.
- Optimised the frontend with responsive design, reusable React components, efficient state management, and local storage-based progress tracking.

Niraksh Guardian | GitHub | Live — Jan 2025

- Gained hands-on experience in AI-assisted application development, integrating AI-based symptom interpretation and conversational health guidance into a web platform.
- Implemented multi-modal health analysis for symptoms, prescriptions, medicines, images, and lab reports, along with contextual specialist recommendations and health-history tracking.
- Strengthened understanding of full-stack architecture, secure backend services, authentication, data management, and scalable system design while following safety and privacy considerations.

TRAINING

Data Structures & Algorithms using C++ | LPU | Certificate — July 2026

- Gained hands-on experience with Data Structures and Algorithms in C++, applying concepts such as arrays, strings, stacks, queues, and hashing to solve programming problems.
- Strengthened problem-solving and algorithmic thinking by implementing efficient solutions and analysing their time and space complexity.
- Improved practical understanding of C++ STL, object-oriented programming, debugging, and software development practices, while gaining hands-on experience with Git and GitHub

CERTIFICATIONS

- Oracle AI Certified Foundations Associate | Oracle | Certificate — Sep 2026
- Introduction to DSA | Coding Tantra | Certificate — Sep 2025
- Programming Using C++ | Infosys Springboard | Certificate — Sep 2025

ACHIEVEMENTS

- Solved 185+ questions on Leetcode and secured multiple problem-solving badges | LeetCode — Aug 2026
- Earned 3-star badges on HackerRank cpp | HackerRank — May 2025
- Built a project at the Code-A-Haunt 2.0 Hackathon (Round 3 Top 15) | CodingBlocks LPU | Certificate — Feb 2025

EDUCATION

Lovely Professional University — Punjab, India
Bachelor of Technology in Computer Science and Engineering; CGPA – 8.62 — Aug 2024 – Present

New Adarsh Senior Secondary School — Punjab, India
Intermediate – 96% — Mar 2022 –Mar 2024
